RE: Closure Extension for the Bridgeton Landfill, Permit Number 118912, St. Louis County

Dear Mr. Walker:

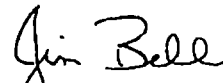

The Missouri Department of Natural Resources' Solid Waste Management Program (SWMP) is in receipt of a letter dated May 24, 2005, indicating that the Bridgeton landfill would like an additional period of time to apply the final cap to the landfill. The letter was submitted on your behalf by Nathan Higgerson, Project Engineer, Aquaterra. Bridgeton LLC will cap the landfill in 2 separate areas. The 16-acre north quarry area will be capped first in late 2005. The 36-acre south quarry area will be capped in 2006 and final cover placement will be completed by December 2006.

The SWMP has reviewed your request for compliance with the Missouri Solid Waste Management Law and Regulations. Your request for an extension until December 1, 2006, to complete closure activities at the landfill is hereby approved.

We appreciate your continued efforts toward environmentally sound solid waste management practices. If you have any questions please contact Ms. Charlene Fitch at (573) 751-5401 or P.O. Box 176, Jefferson City, Missouri 65102-0176.

Sincerely,

SOLID WASTE MANAGEMENT PROGRAM

Jim Bell  
Chief, Engineering Section
